

# Nintex® Live

## Harness Mobile, Social & Cloud Capabilities with Nintex Live

Nintex delivers innovative software and cloud services that empower organizations to automate business processes, quickly and easily – all without a single line of code – increasing the success of business operations. Nintex Live enhances Nintex Workflow and Nintex Forms by adding even more tools to the workflow toolbox, connecting workflows across distributed SharePoint deployments, including Office 365, and extending the reach of business forms to customers, suppliers, and remote workers outside the firewall. With Nintex Live, your workflow possibilities are endless...

Start your free trial by visiting [nintex.com/live](http://nintex.com/live)

Save time and money and unlock organizational knowledge by sharing workflow solutions across branch locations. Nintex Live supports hybrid and distributed deployments by connecting workflows between distributed SharePoint deployments, including Office 365.

Put the power of “the cloud” to work for your business in real-time. Enhance and extend workflows by connecting to a catalog of enterprise and consumer cloud services. Workflow designers can quickly add web services from the catalog to Nintex workflows without writing a single line of code.

Engage with customers, suppliers and remote workers at the click of a button. Nintex Live lets you deploy web and mobile-enabled forms beyond the firewall to securely capture important data and drive key business processes.

Software Assurance is required for activation.
